EXAMINER'S AMENDMENT

1. The following is an examiner's statement of reasons for allowance:

The claims in the application are deemed to be directed to a nonobvious improvement over the invention disclosed in US Pre Grant Publication No. 2004/0205817. Claims 1 and 23 comprise, a step of providing, "upon selection of the first one of events that will extend beyond the scheduled duration, a graphical user interface including a first field for identifying an amount of overrun, a second field for identifying the number of said events that will delayed by the amount of overrun, and a third field for selectively identifying whether a last event of the identified number of events or an event immediately following the last event is to be truncated by the amount of the overrun". None of the prior arts, alone or in combination teach or suggest the step of "upon selection of the first one of events that will extend beyond the scheduled duration, a graphical user interface including a first field for identifying an amount of overrun, a second field for identifying the number of said events that will delayed by the amount of overrun, and a third field for selectively identifying whether a last event of the identified number of events or an event immediately following the last event is to be truncated by the amount of the overrun" in combination with recited limitations of claims 1 and 23.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Art Unit: 2617

3. Authorization for this examiner's amendment was given in a telephone interview with Applicant's attorney, David Bilodeau on February 21st, 2006.
4. The application has been amended as follows:

Replace Claim 1 with:

--1. (Currently Amended) A computer-implemented method of automatically updating television schedule data for a plurality of serially-scheduled events telecast on the same channel, each event having a starting time and a duration, the method comprising:

selecting a first one of said events that will extend beyond a scheduled duration thereof;

providing, upon selection of the first one of the events that will extend beyond the scheduled duration, a graphical user Interface (GUI) including a first field for identifying an amount of the overrun, a second field for identifying the number of said events that will be delayed by the amount of overrun, and a third field for selectively identifying whether a last event of the identified number of events or an event immediately following the last event is to be truncated by the amount of the overrun; and

automatically updating schedule information data for each of said subset of events based upon information about said overrun.--

Replace Claim 23 with:

--23. (Currently Amended) A method of updating a television broadcast schedule of a plurality of serially-scheduled events for a channel, the method comprising:

selecting a first event that is to be overrun among a plurality of listed events;

providing, upon selection of the first one of the events that will extend beyond the scheduled duration, a graphical user Interface (GUI) including a first field for identifying an amount of the overrun, a second field for identifying the number of said events that will be delayed by the amount of overrun, and a third field for selectively identifying whether a last event of the identified number of events or an event immediately following the last event is to be truncated by the amount of the overrun; and

systematically updating a schedule of the serially-schedule events based on the first, second and third fields provided in the GUI.--

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Usha Raman whose telephone number is (571) 272-7380. The examiner can normally be reached on Mon-Fri: 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Kelley can be reached on (571) 272-7331. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
